

Senior Java Developer

Location:

Irving, Texas (and/or various client sites across the United States)

Travel/Relocation:

Must be willing to travel and/or relocate as required.

About the Role:

We are seeking a highly skilled Senior Java Developer responsible for end-to-end development of enterprise applications. You will work across all phases of the Software Development Life Cycle (SDLC) in an Agile environment, delivering scalable, secure, and high-performance solutions.

Key Responsibilities:

- Participate in all phases of SDLC including Requirements Gathering, Analysis, Design, Development, Testing, and Deployment.
- Design and develop enterprise applications using Java, J2EE, Spring Boot, Microservices, Web Services, Angular, JavaScript, jQuery, and HTML5.
- Develop front-end UI applications using Angular, TypeScript, JavaScript, jQuery, HTML5, CSS3.
- Implement DevOps best practices following **CI/CD principles**.
- Develop Jenkins pipelines to checkout code, build applications, run unit and integration tests, and deploy to Cloud environments.
- Develop complex database queries, scripts, and stored procedures to support application development across multiple databases.
- Use Git as the version control system to maintain code integrity and collaboration among development teams.
- Identify areas for code improvement, refactor code, and conduct peer code reviews.
- Prepare and maintain system and technical documentation.

You're a Great Fit If You Are...

- Experienced in enterprise Java application development and Microservices architecture.
- Proficient in Java, Spring Boot, REST APIs, Angular, and modern web technologies.
- Knowledgeable in DevOps tools, CI/CD pipelines, and cloud deployments.
- Strong in database development and performance optimization.
- Passionate about delivering high-quality, scalable software solutions.
